

# Bamidele Tewogbade

Software Developer

I believe the African Tech community is just growing and there is a saying I once saw online by Bernice King which says "tech is the only thing that can unite us all", without bringing about the issue of diversity and the way the community is always willing to help out genuinely.

Also, we all can see the way tech is changing people's life, it's interesting and the challenges it brings makes you want to improve which in turn one way or the other makes you an overall better person.

My dream is to be able to give back to the community and effect change in my own way no matter how little.

## Contact

### Address

Accra, AA

### Phone

708 210 9745

### E-mail

bishoptewogbade@gmail.com

### Twitter

- Basics in C++ and Python

## Interests

Writing codes

Reading Books (I love Atomic Habits by James Clear) also (Living in light by Shakti Gawain)

Of recent I enjoy playing Tom Clancy's Ghost Recon really nice game I must say

## Talking about Elon Musk lol

Hmmmm, the funny thing say around march 2020, the COVID-19 period I somehow stumbled across his profile (Elon Musk) and just kept telling my friends that they should watch this man is going to be the richest man on earth like he was lowkey right but the things he was into are revolutionary and I love his Thinking in First Principles, in short Elon Musk is a genius and at times I wonder how his brain, mind works. How he is able to schedule his time? well so many questions, probably someday i'll get to meet with him in person hehe.
